WeLoc® Gripper POM FD

Fully detectable power closing

WeLoc Gripper POM FD – Sack Clip

Secure & Detectable Closing

WeLoc Gripper POM FD is a Fully Detectable sack and big bag clip developed for use where systems for Metal- or X-ray detection are in operation. The clips are made from a special fully detectable acetal material.

The detectable Gripper is strong and durable with a long life. It is ideal for use in the food, beverage and pharmaceutical sectors.

By using the clip manufacturers reduce the risk of contamination from foreign particles. Their use minimizes the risk of injury to consumers, helps to avoid damage to production equipment and prevent product recalls.

The clip is ideal for reclosing bags of raw materials. Gripper POM FD is designed for use in the most demanding situations.

The rotatable locking button on the clip provides extra security. The clip incorporates special polymers with evenly dispersed additives that make every part of the closure fully detectable. Detectable comes in dark blue coloring, common standard for detectable products.

Standard color: Dark Blue.

Imprint: To your preference.

Type registered trademark.

WeLoc international utility and design patent.

WeLoc Gripper POM 100 FD

WeLoc Gripper POM 150 FD

WeLoc® Gripper POM FD

Fully detectable power closing
